The ACoRN Program

- Designed for any practitioner who may be called upon to care for at-risk babies and their families, regardless of experience or training in neonatal emergencies. Of particular benefit to:
 - Family Physicians
 - Paediatricians
 - Nurses
 - RRT's
 - EMTs
 - Midwives
- Multidisciplinary participation of all disciplines will attend all skill stations to learn the skills necessary to perform a procedure, or to assist the physician during a procedure.
- Provides a systematic approach to the identification and management of babies requiring stabilization.
- Foundation for an educational program that aims to teach the concepts and basic skills of neonatal stabilization and where necessary, preparation for transport to a referral facility.
- ACoRN process applies to babies, post delivery room resuscitation, who need assistance in the transition from fetal life, and babies who become unwell or are at risk of becoming unwell in the first few hours after birth.

Testimonials

"I found working through the cases to be very helpful in solidifying the whole process. I really enjoyed the day 2 skill stations, which were very helpful".

Dr. K. Schipper, Family Medicine, Chesley Medical Clinic

"The second day of hands on case studies and skill stations was phenomenal! Fabulous workshop! This learning experience was so much better than S.T.A.B.L.E., almost not comparable."

RN, Chatham

"I thoroughly enjoyed the entire workshop. It was a highly useful, interactive and very organized approach, which will be incredibly useful for my practice. The small group size was ideal". M. Scroggie, RM, Midwives Nottawasaga, Collingwood, Orillia

"As a Nurse Practitioner, I would have loved to have this education at the beginning of my NP program. It helps to organize assessment and intervention in a concise and comprehensive way."

G. Fernandes, NP, NICU, LHSC, London

**MainPro and MOCOMP credits
are available for this workshop**

Workshop Objectives

Day 1

- Basic review of the ACoRN process in an interactive format, using case scenarios and small group discussion.

Day 2

- Focus on skill stations and specific cases to integrate the ACoRN sequences into practice. Participants will rotate through each of the skill stations, including:
 - Chest tube insertion & emergency evacuation of pneumothoraces
 - Umbilical line
 - Intra osseous insertion
 - X-ray interpretation
 - Megacode
 - Admitting the Baby
