

UV Sanitizers

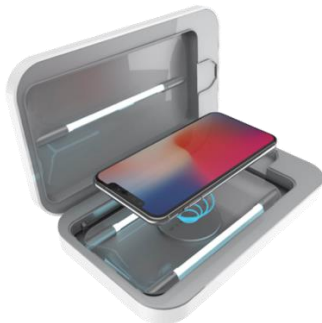

Below are a couple of UV Sanitizers that LHSC has reviewed. Please note that MNCYN is not promoting any one product but is offering this information for hospitals in the region to review in accordance with the needs of their own organization.

CleanSlate UV: Mobile Device Sanitizer - CleanSlate UV: Hospital-grade UV Light Sanitizer for Phones & Tablets

Kill the bacteria on phones, tablets and other mobile devices in just 30 seconds. CleanSlate is used by hospitals and food processing facilities to sanitize sensitive touch screens and kill over 99.99% of MRSA, C. Difficile and other superbugs.
