sanitize at the speed of light

[cleanslateUV.com](http://cleanslateUV.com)

# Designed for peace of mind

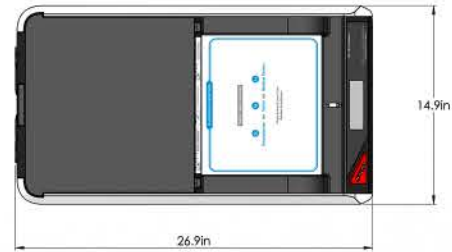

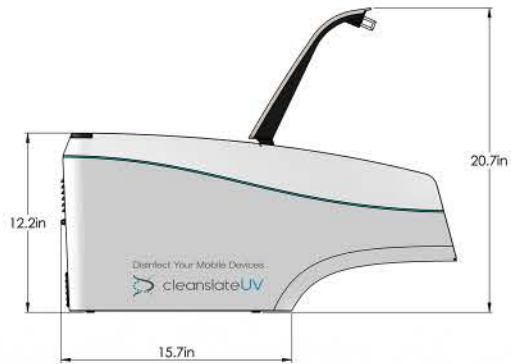

CleanSlate UV uses UV-C light to kill superbugs on a range of devices more effectively and with more speed than any competitor. No training is required and the touch-free device removal allows proper hand hygiene integration.

CleanSlate UV gives your patients and staff the peace of mind that clean hands will stay that way.

# Technical Specifications

## Pathogenic Kill Rate

- **ENTERIC & VIRAL**
- **ANTIBIOTIC RESISTANT**
- E. coli 3.9 log (99.987%) reduction
- **STAPHYLOCOCCUS**
- MRSA 5.04 log reduction (99.9991%) reduction

## Specifications

- **4H 4D 10**
- Tray: 9.5" x 11.3" x 4.5"
- Desktop Footprint: 15.7" x 14.9"
- Weight: 35 pounds (16 kg)
- Voltage: 110VAC ± 10%, 60Hz
- **REMOVES 99.9999%**

## Performance

- **SPH 10000**
- **10000000**
- Suitable Devices: smartphones, tablets, pagers, spectralink phones, badges, stethoscopes & other non-critical items

## Consumables

- Six UV-C compact germicidal lamps (six-month lifespan rating)

## Software

- Web-based software (optional)
- RFID compatible

## Regulatory Standards and Certifications

- UL/IEC 61010-1 (Electrical Safety)
- **UL 1950**
- **UL 147**
- FCC and IC listed; UL and CE approval
- **UL 1950**

## Warranty

- One-year limited manufacturer warranty (excludes UV bulbs)
- Two-year limited manufacturer warranty (optional)
